#### **DETAILED ACTION**

### Specification

1. The amendment filed 16 September 2005 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material, which is not supported by the original disclosure, is described in the 112 rejection below.

Applicant is required to cancel the new matter in the reply to this Office Action.

### Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the first paragraph of 35 U.S.C. 112:
  - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 3. Claims 1-5, 8-22, 25, and 26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The added limitation that the other part does not have wireless communication means operating at the first frequency, in claims 1 and 26, is not supported by the specification. Applicant cites 3 sources for this limitation in the specification, and states that they imply this limitation. Implications are not seen as disclosure, and the specification could easily read on a

Art Unit: 2134

device where the other party does have wireless communication means operating at the first frequency.

### Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 5. Claims 1-5 and 8-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Wang, US Patent Number 6,175,922.

With regard to claims 1, 16, 21, 22, and 26, Wang discloses an access device (PEAD, column 18 lines 33-36) including means for wirelessly (column 18 lines 44-47) receiving a key (column 18 line 63- column 19 line 4, column 17 line-column 18 line 3) and validity information (column 7 lines 45-60, encrypting the key), and a wireless means for establishing a connection with another party (column 19 lines 8-9, column 18 lines 5-7) to provide the key and validity information (column 19 lines 4-9) where if the key and information are valid, access is provided (column 19 lines 9-14), and the communications operate at different frequencies (column 19 lines 15-20 and column 19 line 66-column 20 line 3), and the lock on the door does not need to be able to connect with the internet directly.

Application/Control Number: 09/893,165

Art Unit: 2134

With regard to claims 2-4, Wang discloses the PEAD receives, and displays to the user additional information, such as price and items (column 19 lines 58-52).

With regard to claim 5, Wang discloses the display can be substituted for an audio output (column 11 lines 57-60).

With regard to claims 10 and 11, Wang discloses the means for establishing a connection can be done using short range wireless communication capabilities such as Bluetooth and infrared (column 19 line 66-column 20 line 3) and that the receiving means can be done with a cell phone (column 18 lines 33-36).

With regard to claims 8 and 9, Wang Bluetooth uses a high frequency (How Bluetooth Works, page 4) and low power (How Bluetooth Works, page 5).

With regard to claim 12-14, Wang discloses that the PEAD can have more than 1 coupon, where each coupon is identified with a specific food (column 18 lines 28-32).

With regard to claim 15, Wang discloses using the dice to gain access to a hotel room (column 19 lines 4-9).

With regard to claims 17 and 18, Wang discloses the key is encrypted using the merchant's private key (column 19 lines 3-4).

With regard to claims 19, 20, 23, and 24, Wang discloses the validity information can include the user ID or time related information (column 7 lines 52-56), which specifies the period of validity of the key (column 11 lines 49-53). Further, Wang discloses the information could be airline and theatre tickets (column 19 line 1). These tickets inherently have a time, which indicated the period of validity.

With regard to claim 25, Wang discloses the PED can be mobile (column 18 lines 33-35).

## Response to Arguments

6. Applicant's arguments filed 16 September 2005 have been fully considered but they are not persuasive.

With regard to applicant's argument that Wang does no disclosure that the PEAD has both rf and Bluetooth capabilities, the examiner points out that no claim claims the PEAD has both capabilities. The examiner asserts that the PEAD is disclosed as having wireless Internet capabilities (column 17 lines 63-66) to receive a hotel key and Bluetooth capabilities (column 19 line 66-column 20 line 3) to send the key information to the POS terminal (the hotel room door, column 18 lines 4-7). The door does not need to have wireless Internet, since it receives its validity information through the hotel's server (which could be cable connected to the internet).

#### Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob Lipman whose telephone number is 571-272-3837. The examiner can normally be reached on M-Th 7 AM-3 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Morse can be reached on 571-272-3838. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
